

THE CONNECTED WORKER PLATFORM (CWP®)

Empower your front line with everything they need in one place

WHAT IS 'CONNECTED WORKER PLATFORM'?

PARSABLE® provides a revolutionary solution designed to transform industrial operations by digitally connecting frontline workers, processes, and data. It is a comprehensive digital platform that bridges the gap between the physical and digital worlds, enabling real-time collaboration, data capture, and insights across the entire workforce.

CWP® VALUE PROPOSITION

Operational Visibility

Gain deep insights into your operations with real-time analytics, dashboards, and reporting. Identify bottlenecks, trends, and areas for improvement to optimize efficiency.

Standardized Processes

Ensure consistency in processes and procedures by delivering digital work instructions, reducing training time, and minimizing variations in task execution. (100% Compliance to Standards)

Real-time Data Capture

Workers can capture critical data, observations, and insights directly from the field, eliminating manual processes, reducing errors, and ensuring accurate data availability for analysis. (100% digital traceability)

Enhanced Collaboration

The platform fosters seamless communication and collaboration among workers, supervisors, and teams, ensuring everyone is on the same page and enabling quick issue resolution.

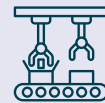

Rapid Onboarding / Risk Mitigation

Streamline the onboarding process for new workers by providing them with intuitive digital guides, reducing the learning curve and accelerating their productivity.

THE CONNECTED WORKER PLATFORM (CWP®)

Empower your front line with everything they need in one place

WHO SHOULD USE CWP®?

Tailored for industries with frontline and field workers, including manufacturing, energy, utilities, and construction. It benefits operations managers, supervisors, safety teams, quality control personnel, and frontline workers seeking to streamline processes and enhance collaboration.

HOW QUICKLY CAN I IMPLEMENT CWP®?

Once your requirements are defined, we will adjust our turn-key capability and tested a G2M pilot. A valid Proof of Concept (POC) can be roll-out within days or weeks.

HOW MUCH DOES CWP® COST?

Flexible pricing structure based on the specific needs and scale of your organization. Pricing may include licensing fees, implementation costs, and ongoing support.

“ Digitizing safety program components using Parsable and analyzing the resulting data has enabled us to make changes proactively before workplace incidents happen.
