THE APS THAT DELIVER

Beyond Planning—Into Action

Problem: Misaligned resources, disrupted execution.
Solution: Optimized schedules, real-time alignment.

We integrate to make your supply chain smarter, faster, and resilient

Kinaxis powers agile supply chain planning—PlanetTogether brings it to life. ✓

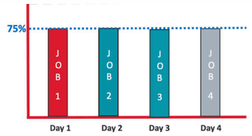

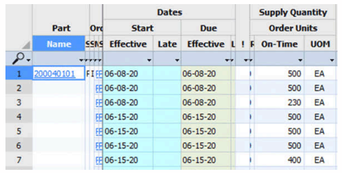

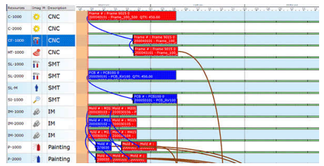

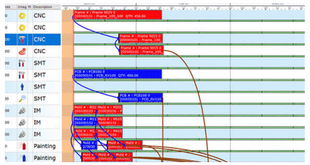

The Difference?
Kinaxis focuses on planning. We take it further—turning plans into optimized execution.
Faster decision-making with real-time scheduling insights.
Smarter resource allocation for labor, machines, and materials.
Proven results in reducing lead times and increasing on-time delivery.

Why PlanetTogether?
Many companies rely on Kinaxis for high-level supply chain planning, but when it comes to real Advanced Planning & Scheduling (APS), you need a solution built for precision, flexibility, and speed.

	PlanetTogether	Kinaxis
True Advanced Planning and Scheduling	Yes – Built for APS	No – APS is a feature.
Real-Time Scheduling	Yes	Limited
Bottleneck Reduction	Yes	Basic functionality
Demand Adaptability	Yes – Instant response to changes	Not APS-driven

KINAXIS® planet together

WHAT'S PLANETTOGETHER?

	Planning	Scheduling	MES
Capacity	Bucketed 	Capacity of a resource is continuous 	Capacity of a resource is continuous 
Frequency	Monthly/Weekly/Daily	(sub)daily	Continuous
Granularly	WorkCenter, Workorder, Major Constraints	New order quoting (Capable to Promise)	New order quoting (Capable to Promise)
Heuristics	Calculating optimal demand coverage	Efficient sequence of operations	Efficient sequence of tasks
Time horizon	3 weeks to 6+ months	Now to 6 weeks	Now to 3 days
Time Unit	Buckets (days, weeks, months)	Continuous time	Continuous time
Resources	Constraints (Dept/Machine Park)	Work centers (individual machines)	Work centers (individual machines)
Sequencing and Synchronization	Predetermined sequencing inside bucket; no synch. 	Second by second within each work center and across production routings. 	Second by second within each work center and across production routings. 

	Part		Dates				Supply Quantity	
	Name	SSN	Start Effective	Start Late	Due Effective	Due L	Order Units On-Time	Order Units UOM
1	200040101	FI	06-08-20		06-08-20		500	EA
2			06-08-20		06-08-20		500	EA
3			06-08-20		06-08-20		230	EA
4			06-15-20		06-15-20		500	EA
5			06-15-20		06-15-20		500	EA
6			06-15-20		06-15-20		500	EA
7			06-15-20		06-15-20		400	EA

KINAXIS® planet together

WHAT'S PLANETTOGETHER?

SMART Planning & Scheduling Platform
(**S**cenario-based, **M**ulti-Planner/Plant, **A**utomated, **R**eal-**T**ime)

Business Functions

- Production Scheduling
- Inventory Planning
- Capacity Planning
- Production Execution
- Capable To Promise
- Production Analysis

Top Use Cases

- New order quoting (Capable to Promise)
- Demand-driven replanning (Inventory Plan
- and Detailed Schedule Optimization)
- Resource availability disruption
- Material availability disruption
- Order Expedite
- Proactive resource capacity planning

WHAT'S PLANETTOGETHER?

System features

- Real-time Concurrency
- In-Memory Computing
- Azure Data Factory Integration
- Bi-directional Integration to any open system
- Extensibility
- Multi-Language
- Workspaces
- Themes
- Cloud or On-Premise

Constraints Features

- Single, Batch, Multi-tasking & Infinite Resources
- Machine, Labor and Tooling
- Raw and Intermediate Materials
- Sequence-dependent Setups
- Operation Overlap (parallel processing)
- Shelf-Life
- Lot Control
- Extensible constraints to fit almost any need

WHAT'S PLANETTOGETHER?

Platforms features

- Optimization, including Copilot(™)
- Scenario Comparison
- Metrics *(past/present/future)*
- Predictive KPIs
- AI Enabled Analytics *(PowerBI)*

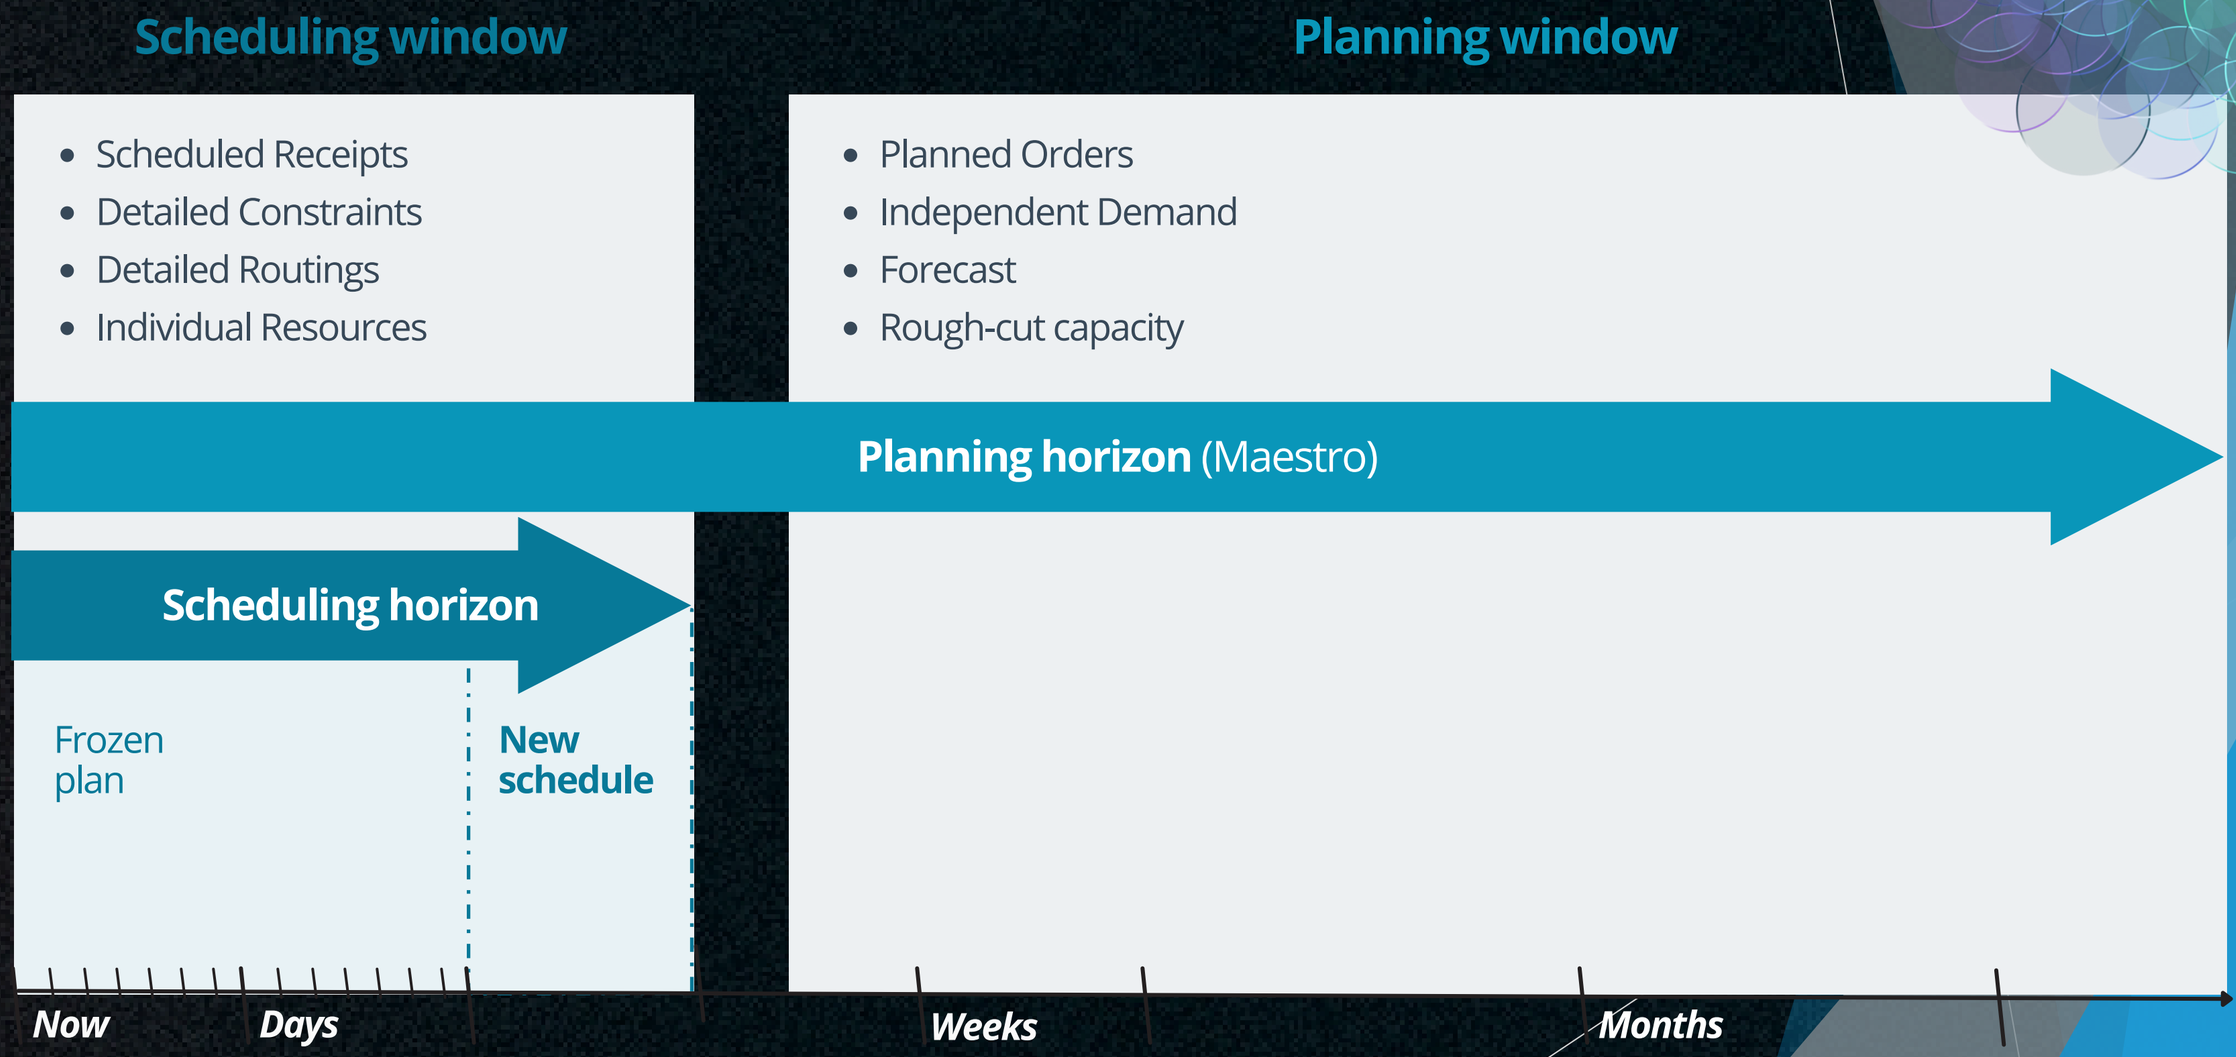

Security features

- SSO
- SOC 2 attestation
- End-to-end Encryption

Analytics & Reports

- Schedule Reports
- Capacity Analysis
- Inventory Analysis
- Conformance to Schedule
